Language: JavaScript, Java,Typescript,
Web-Technologies - CSS, Bootstrap,HTML, Tailwind CSS,
Database: MySQL, MongoDB,
Cloud/DevOps: Git,Linux,.

WORK EXPERIENCE

Om Logistics Ltd.

Software Engineer   *July 2022 – Present*

- Created RFQ contract modules, streamlining contract creation and management processes.Automated PDF generation for contracts, enhancing efficiency and accuracy.Collaborated with cross-functional teams to customize modules to business needs.Provided training and support for end-users to ensure smooth adoption.

- Designed and implemented Retail Rate Card modules tailored for contracts involving small amounts and weights. Developed systems that efficiently manage pricing structures and contract terms, resulting in a 20% reduction in contract processing times. Contributed with key business units to gather input and customize modules, aligning systems with specific operational needs and increasing user satisfaction by 15%. Supplied comprehensive training and ongoing support to 30 users, enhancing their proficiency in utilizing Retail Rate Card modules and reducing errors by 25%.

- Built contract tracking systems that enabled monitoring of over 500 contracts, facilitating efficient management of contract status and progression through various stages.

   Engineered and introduced a multi-level proposal approval system that streamlined the approval process across four levels of hierarchy, reducing approval times by 30%.
   Created intuitive user interfaces that enhanced user experience, resulting in a 25% increase in user satisfaction ratings for contract status monitoring and proposal approvals.
   Engaged with 10 key stakeholders to gather requirements and customize systems, resulting in a 15% increase in system alignment with specific business needs.
   Offered training and support to 50 users, ensuring effective utilization of contract tracking and proposal approval systems, leading to a 20% reduction in user errors.

- Enabled users to fill personal details and upload documents securely online.

   Verified user identities and ensured data integrity.
   Simplified the workflow for HR personnel to authenticate and approve user submissions.
   Elicited requirements and customized solutions to meet specific organizational needs.
   Ensured seamless utilization of the documentation verification system for users and HR staff.

CyberSocial Pvt. Ltd.

CyberSecurity Intern   *Jun 2022 – Aug 2022*

- Hands-on Experience: Engage in real-world cybersecurity projects, including vulnerability assessments, penetration testing, and incident response simulations to gain practical skills.

- Mentorship: Receive guidance and feedback from seasoned cybersecurity professionals who will mentor you in developing your skills and navigating the industry landscape.

- Networking Opportunities: Connect with industry professionals, fellow interns, and potential employers at networking events, workshops, and collaborative projects, expanding your professional network.

- Professional Development: Expand your cybersecurity expertise through workshops, training sessions, and exposure to advanced tools and technologies, equipping you for a thriving career in cybersecurity.

LEADERSHIP AND MENTORING

- Mentored new interns as well as juniors, guiding them through code development as well as basic coding guidelines.

- Exemplified coding practices, taking full ownership of the codebase and its related components, while effectively communicating its development process and the remarkable results achieved.

- Managing a full-fledged team of around 3 people, overseeing the development and testing, guiding them through the code and assigning tasks, and helping with active tasks and issues.

EDUCATION

Maharishi Dayanand University   **Rohtak, Haryana**

Bachelor of Computer Science Engineering   *Graduation Date: July 2022*
